BY

DEPUTY

Project Location: Statewide

Document Type: Initial Study/Proposed Negative Declaration

Local Action Type: The Energy Commission's mandate is to promote energy efficiency through a variety of means, including efficiency standards for appliances based on the provisions in Public Resources Code Section 25402.

In the rulemaking proceedings, the Commission is proposing to adopt new efficiency standards for small diameter directional lamps and general service LED lamps. The Commission is proposing changes to the appliance efficiency standards as an action to support its mandate.

The California Environmental Quality Act (CEQA), Public Resources Code Sections 21000 et seq.) requires public agencies to identify and consider the potential environmental effects of their "projects," as that term is defined, and when feasible to mitigate any related adverse environmental consequences. The proposed adoption of regulations is a considered project under CEQA, as it is a discretionary action which has a potential for resulting in either a direct physical change in the environment or a reasonably foreseeable indirect physical change in the environment. Therefore, the Commission prepared an Initial Study to assess the potential significant effects of the proposed regulations on the environment and determined that there is no substantial evidence that the project may cause a significant adverse impact on the environment.

Development Type: The proposed standards require small diameter directional lamps and general service LED lamps to reduce electricity demand throughout the state.

Funding: N/A

Project Issues Discussed in Document: Air Quality, Water, and Energy, Cumulative Effects and Mandatory Findings of Significance

Present Land Use/Zoning/General Plan Designation: The Commission's mandate includes (Public Resources Code section 25402) promoting energy efficiency through cost effective, feasible standards in product design. The standards include provisions intended to reduce

statewide water and energy use. Content of the standards includes mandatory minimum efficiency levels, certification, labeling, as well as general provisions on the scope of the regulations and definitions.

Project Description: The project encompasses amendments to state appliance efficiency regulations that establish levels of efficiency and operating requirements for newly manufactured small diameter directional lamps and general service LED lamps sold in the state. This project is available at the Commission's website at <https://efiling.energy.ca.gov/Lists/DocketLog.aspx?docketnumber=15-AAER-06>.

Schedule: Comments should be submitted by March 30, 2015, by 4:00 p.m.

Public Review Period:

Starting Date: October 16, 2015

Ending Date: November 14, 2015

Documents:

All relevant documents are available at:

<https://efiling.energy.ca.gov/Lists/DocketLog.aspx?docketnumber=15-AAER-016>.

Public Meetings and Adoption:

A Hearing to discuss the content of the standard amendments and the finding of the initial study will occur on:

November 18, 2015, 10:00 a.m.
California Energy Commission
1516 9th Street
Sacramento, CA 95814

An adoption hearing by the full Commission will be held on:

December 9, 2015, 10:00 a.m.
California Energy Commission
1516 9th Street
Sacramento, CA 95814
(916) 654-5006
